

Land Management & Acquisition Committee
November 18, 2014
AGENDA

Item #1: Accept the minutes of the October 7th meeting.

We need to vote on the acceptance of these minutes.

Item #2: Designated Trails in Approved Subdivisions

A number of subdivisions approved over the past 20 years were supposed to have trails in or around them. Few of them actually exist now.

At the request of a Cornerstone resident, one such subdivision, Bob has been exploring the possibility of re-establishing one such trail from Longwoods Road into the existing WRCF trail system.

The broader question is this: Should we actively try to re-establish these trails? And how do these sub-division requirements get enforced?

Item #3: November 24th Council Meeting

What do we need to do to prepare for this meeting?

Item #4: Winter Plowing

What trailhead parking areas should be plowed this winter? Not plowed?

Item #5: Executive Session to Discuss a Potential Property Acquisition

Pursuant to MRSA 1 section 4056C, the Committee will go into executive session to discuss a possible property acquisition.

Item #6: Updates

- Cragin access easement
- IF&W Award
- MNRCP grant status
- RP bridge
- LMF / USFS grant status
