**Reminder: Traffic Delays Expected on Rte. 1 Martin's Point Bridge**

PORTLAND – As a reminder, CPM Constructors will be restricting traffic to one alternating lane of traffic later this week as they construct the new retaining wall by Martin's Point Health Care on Rte. 1 in Portland. The work will begin at 6:30 am and continue through until 5:30 pm, although workers will begin letting traffic flow freely at 4 pm Friday due to the upcoming Memorial Day Weekend.

Travelers who do not want to be subjected to delays should find alternate routes.

The Martin's Point Bridge was built in 1943; the replacement is now being built adjacent to the existing bridge and should be open to traffic within the next month.
