SETBACK VARIANCE CRITERIA

The Board may grant a setback variance for a single family dwelling when strict application of this Ordinance to the petitioner and the petitioner's property would cause undue hardship. There are five criteria, each of which must be met before the ZBA can find that a hardship exists. Please explain how your situation meets each of these criteria listed below, either in the space provided or on a separate sheet:

A. The need for a variance is due to the unique circumstances of the property and not to the general conditions in the neighborhood. (The applicant must show that this property has unique characteristics different from surrounding properties and that these differences are the reason for the need for a variance.)

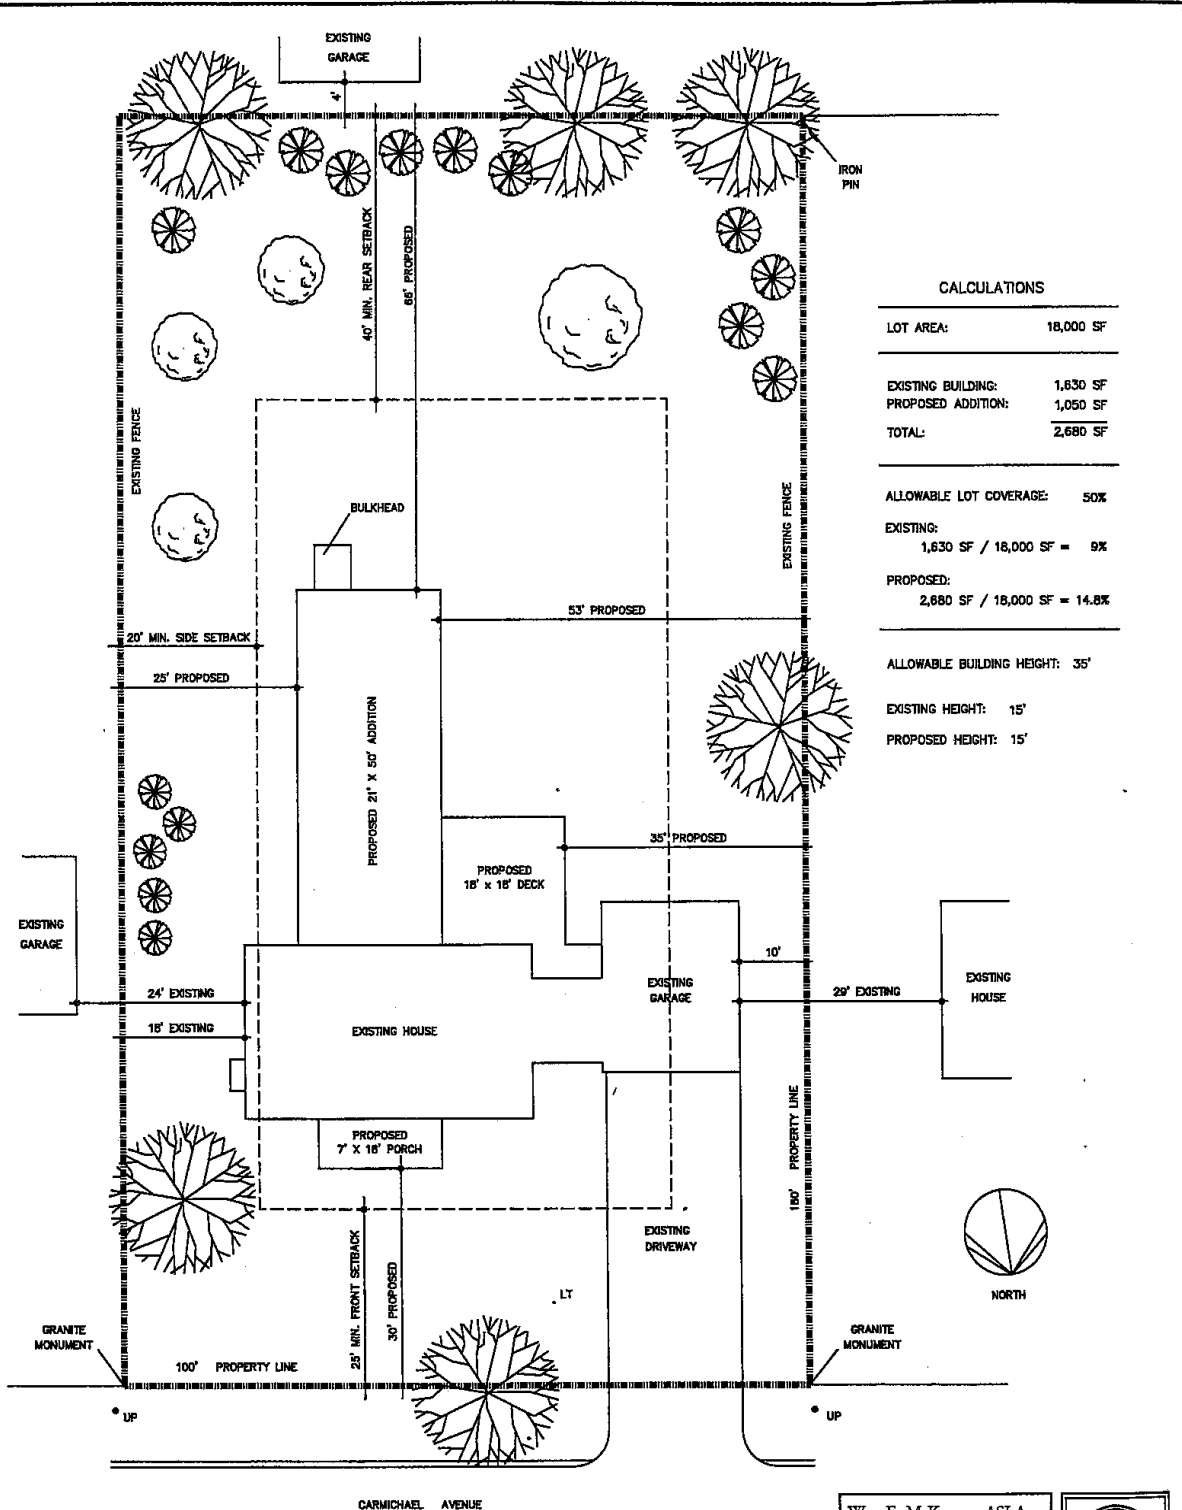

B. The granting of a variance will not alter the essential character of the locality.

C. The hardship is not the result of action taken by the applicant or a prior owner. (The applicant must demonstrate that the need for a variance is due to the nature of the property, not the action of owners.)

D. The granting of the variance will not substantially reduce or impair the use of abutting property.

E. The granting of a variance is based upon demonstrated need, not convenience, and no other feasible alternative is available.
