

Sustainable Business Recognition Summary

REAC Green Energy Award Goes to _____

The mission of the Falmouth Recycling and Energy Committee (REAC) is to save energy costs and reduce greenhouse gas emissions in Falmouth. In order to recognize Falmouth citizens who are making extraordinary contributions to these goals, REAC has instituted an award to recognize those citizens who have demonstrated extraordinary commitment. The award will be publicized in the REAC Newsletter.

REAC is pleased to announce that _____ will receive the inaugural award. As the attached photo demonstrates, _____ has installed solar panels on the roof of its building, and has an EV charging station. Two of the principals of Stafford Investments drive EVs, and there is a Tesla charging station located at the business. Stafford Investments is clearly committed to saving money on energy costs and reducing its carbon footprint.

In the future, REAC hopes to recognize Falmouth citizens who are making significant contributions to reducing energy consumption and lowering their carbon footprint in other ways well. If you know of a Falmouth citizen you would like to nominate for the award, please contact
