**RE: RFQ for Consultant Services to Conduct a Public Process to Develop a Town Vision and Values Statement (Phase 1) for the Town of Falmouth, ME**

Dear Mr. Poore,

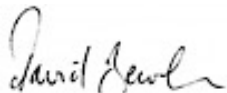

Future iQ is pleased to submit this REVISED proposal to conduct a public process to develop a Town Vision and Values Statement for the Town of Falmouth. This revision takes into account the adjusted start date, and some methodology changes to account for virtual engagement in the initial phases. As we outlined in our original proposal, Future iQ has a strong track record of designing and implementing visioning and planning projects across North America, Europe and Australia. Some of the strengths we believe we bring to this project include:

- **We know Maine and the tourism economy.** Future iQ has worked extensively in Maine, particularly on visioning, strategic planning, and tourism development. Future iQ was recently contracted to work with a consortium of organizations to explore the tourism and economic development potential in the Maine Woods area. This project covered most of Maine, and included seven identified regional areas, primarily to the west of the coastline. The work included exploring the potential economic impact of tourism, and research on important emergent trends shaping outdoor and recreation tourism sectors. In 2017, Future iQ also developed a vision and strategic action plan for the Moosehead Lake region.
- **We specialize in strategic planning, visioning and stakeholder engagement.** Stakeholder engagement and collaboration building are cornerstones of Future iQ's visioning and strategic planning methodology. Our planning process specializes in applying innovative tools and approaches that bring together stakeholders to create collaborative and visions and strategic action plans, and an aligned vision for the future. Importantly, our planning process provides a collaborative place for participants to share expertise and ideas, and to openly consider various perspectives on issues of concern. We have a team of accomplished facilitators who are well versed in steering stakeholder discussions, and exploring local sensitivities and aspirations.

- **We understand the need for balanced community and economic development.** We have worked with many cities, towns, counties and regions at points-in-time when communities have reached generational change, industry tipping points, and other scenarios that involve significant redevelopment phases. For example, our work with the City of Edina in Minnesota involved extensive public engagement with businesses, neighborhood and housing associations, community organizations and individual homeowners as they dealt with issues such as teardowns and rebuilds, re-purposing commercial properties, and higher density zoning issues. Balancing the need for redevelopment as well as the need to maintain the essential character and charm of a community was crucial in the visioning process. Future iQ will bring this sensitivity to Falmouth's visioning process.
- **We bring a future oriented perspective.** Future iQ specializes in studying and understanding larger emergent trends and influences that are re-shaping industries and regions, especially in the Northeast USA. We have also published foresight research on the 'The Future of Tourism – Maine Woods Region', 'Future of Manufacturing', 'Cities of the Future', 'Economics of Collaboration', and the 'Future of Food'. We hosted a global Think Tank forum at Windsor Castle (UK) on 'Building Sustainable Regional Communities' and hosted an additional Think Tank forum there on 'The Future of Urban Living' in December 2018. This experience and knowledge helps us shape truly future oriented planning processes.
- **We understand the power of good data.** Future iQ specializes in sophisticated data collection and analysis. We believe that good stakeholder engagement processes and data collection, presented in a transparent and interactive manner, can help build rapid alignment around key points of consensus.

Future iQ delivers innovative and customized projects on time and on budget. Our hands-on approach, as well as the effectiveness of our methodology, will help the community stakeholders of Falmouth to maximize the value of the visioning process and achieve realistic actionable outcomes. It would be our privilege to work with the Town of Falmouth on this initiative. Please contact me for clarifications as needed. Thank you for your consideration.

Yours sincerely,

David Beurle  
CEO, Future iQ, Inc.

# 1.0 Qualifications of the Consultant

## 1.1 Firm Background – About Future iQ

Future iQ is a global research and consulting company specializing in visioning and planning for regions, towns, communities, and industries. Founded in 2003, Future iQ’s global footprint brings a broad perspective and delivers transformational customized solutions to local environments. Future iQ’s clients span North America, Europe and Australia. Future iQ works across cultures, sectors and languages to shape unique and effective planning solutions for each of our clients. The Team assigned to this project has extensive experience in visioning and planning projects in the United States.

<p>Future iQ specializes in the following functional and sector areas:</p> <ul style="list-style-type: none"><li>• City, Urban and Regional Planning</li><li>• Economic and Workforce Development</li><li>• Defense Sector Engagement</li><li>• Organizational and Corporate Planning</li><li>• Non-profit Strategic Planning</li><li>• Tourism Industry Planning and Analysis</li></ul>	<p>Future iQ’s specialized methodology includes:</p> <ul style="list-style-type: none"><li>• Strategic Planning and Visioning</li><li>• Stakeholder Engagement</li><li>• Network and Supply Chain Mapping</li><li>• Data Visualization</li><li>• The Future Game</li><li>• Customized Foresight Research</li></ul>

## 1.2 Proposed Project Team Members – Revised

The proposed client-facing Future iQ team has significant experience working on visioning and planning projects. We recognize that this project requires significant periods for intensive workloads and our team availability will allow sufficient team resources to be deployed for data analysis and report preparation. The proposed team members are an experienced and reliable team, with a complementary mix of required skills in:

- Highly developed critical thinking capacity in the areas of visioning and strategic planning, organization design, and collaboration building
- Knowledge and experience with municipalities, corporations, regional entities and non-profit organizations
- Detailed practical experience in research, stakeholder engagement, economic and data analysis and data visualization
- Project management and stakeholder workshop facilitation, including extensive experience in visioning, economic and workforce development, industry cluster development, economic analysis and impacts research

The proposed Future iQ team is modified slightly to accommodate as anticipated to more virtual engagement (at least in initial phases), and more ‘frontload’ of future driver information. The specific changes from the original proposal include:

- Adding Celine Beurle as project co-ordinator in anticipation of more logistics in task force sessions. In addition, she will lead the communication / Social media strategy. This component is being strengthened, due to the more virtual communications required.
- Bringing forward the role of Johanna Hoffman in foresight work for virtual taskforce sessions

### Revised Future iQ Team

Team Member	Title	Role
David Beurle	CEO, Future iQ, Inc.	Project Director, Facilitation, Strategy Development
Celine Beurle	COO, Future iQ, Inc	Project Co-ordination, communications portal and strategy
Johanna Hoffman	Sr. Foresight and Planning Specialist, Future iQ	Urban Design and Environmental Planning, Engagement Design
Heather Branigin	VP, Foresight Research	Research, Strategy Development, Engagement, Writing
Walter Paixao-Cortes	Data Engineer	Data Analysis and Visualization
Tobiloba Adaramati	Data Analyst	Data Analysis, Benchmark
Marc Rassel	Creative Director	Report Design

### CELINE BEURLE, B.A., M.A.

#### C.O.O. FUTURE IQ

Celine is Chief Operating Officer of Future iQ and Managing Director of Future iQ Europe. Within her role within the company since 2012, she has also been responsible for global expansion, expanding the geographical reach of the company to encompass South America, Italy, Spain and the UK so far. With an academic background in Sociology and Philosophy, Celine is passionate about understanding society and this has led to her ongoing interest in pursuing societal change, which has enabled Future iQ to view projects through the often needed 'sociological' lens. As COO, Celine also works with the CEO on the strategic direction of the company and communications within the company. One part of her many roles is that of project management of many global projects. She also works on projects as the direct lead person regarding communications and marketing/branding. Celine has an innate ability to produce a coherent communications and branding element to any Future iQ project.

### HEATHER BRANIGIN, B.A., M.A.T.

VICE PRESIDENT, FORESIGHT RESEARCH

Heather began work with Future iQ in 2015 as primary researcher and author of Future iQ's foresight publication *The Future of Food*, and recently co-authored *The Future of Urban Living* and *The Next Industrial Revolution*. She has extensive experience in local government and the nonprofit sector, and is an accomplished project manager and research analyst. Heather has a well-developed ability to assimilate information into thoughtful and coherent writing. She applies the integration of future trends, data analysis and public engagement into implementable strategy development for clients. Through her work, Heather seeks to provide that critical resourceful guidance needed to empower communities and organizations to make decisions that build sustainability and resiliency as they face a future of accelerations and change. Originally from Canada, Heather has pursued her international interests through her philanthropic work with the United Nations Association of Minnesota.

## 1.2.5 Walter Paixao-Cortes, Data Engineer

### RÉSUMÉ

#### EDUCATION

Doctorate in Computer Science (Bioinformatics/  
Natural Language Processing)

Pontifical Catholic University of Rio Grande do  
Sul, 2015 to present

Masters Degree in Computer Science  
(Bioinformatics)

Pontifical Catholic University of Rio Grande do  
Sul 2013 – 2015

Bachelors Degree in Computer Science  
Pontifical Catholic University of Rio Grande do  
Sul, 1995 – 2002

#### EMPLOYMENT

Data Engineer – Future IQ (2017 – present)

Senior Software Engineer – Dell Computers,  
Brazil (2000 – present)

Software Engineer – Accenture, Brazil (2003 –  
2005)

### WALTER R. PAIXÃO-CÔRTEES, MA, BA

DATA ENGINEER, FUTURE IQ

Walter is a senior software engineer with 24 years of experience in the software development industry, working across different domains including Human Resources, Finance and Product Engineering. He has expertise in data analysis, creating ETL pipelines, building data visualizations in many different technologies (SAP Business Objects, Oracle BI Enterprise Edition, QlikView and Tableau), and has experience in working with high data volumes to extract insights. Walter has an academic background in Computer Science with a Masters in Bioinformatics, and a Doctorate (in progress) in Bioinformatics with a minor in Natural Language Processing.

## 1.2.6 Tobiloba Adaramati, Data Analyst

### RÉSUMÉ

#### EDUCATION

B.Tech. (First Class) Degree  
in Mathematics Education  
Federal University of Technology, Minna, 2015  
N.C.E Degree in Computer and Mathematics  
Federal College of Education  
(Technical), Akoka, 2011

#### EMPLOYMENT

Data Analyst. Future iQ  
USA and Europe, 2017 – Present  
Results Measurement Expert. JMSF  
Agribusiness, Nigeria, 2018 – Present  
CEO. Growth Analytics Consulting  
Nigeria, 2017 – Present  
Monitoring and Evaluation Analyst.  
Solina Group, Nigeria, 2016 – 2017  
Research Analyst. Solina  
Group Nigeria, 2015 – 2016

### **TOBILOBA ADARAMATI**, *B. Tech. (Edu).*

#### *Data Analyst*

Tobiloba Adaramati is a mathematician who sees the beauty in data. She is an expert in data processing, opinion mining, sentiment and reputation analysis. Through her unique perspective, Tobiloba sees each data point as a unique part of a puzzle which put together correctly, creates a clear picture. She uses various forms of data to provide valuable insights and reveal underlying trends. Her background includes a first-class degree in mathematics and experience providing monitoring and evaluation services for international development programs. Tobiloba has worked with Future iQ since 2017, providing data and analytics expertise.

#### RECENT PROJECT EXPERIENCE

## 1.2.7 Marc Rassel, Creative Director

### RÉSUMÉ

#### MARC RASSEL

marc@future-iq.com

#### EDUCATION

Bachelor of Fine Arts, Graphic Design,  
University of Wisconsin–Stout, 2007

Wisconsin State Certificate,  
Printing and Publishing, Fox Valley  
Technical College, 2002

#### EMPLOYMENT AND ASSOCIATIONS

Creative Director, Future iQ,  
2012 – Present

Owner and Creative Director,  
Align Multimedia, 2012 – Present

Creative Director - Print Advertising,  
Menard, Inc., 2007 - 2011

Board of Directors, Rifle Farmers Market,  
Rifle, Colorado, 2014 - 2018

### MARC RASSEL, B.F.A.

#### CREATIVE DIRECTOR

Marc is an accomplished design and marketing professional who has worked across many different industry verticals over the past 15 years and brings a multidisciplinary approach to design and marketing. He co-founded Align Multimedia in 2012 and has served as its Creative Director since the company started. He has helped numerous organizations grow and expand their reach with multi-channel marketing across traditional, digital, and emerging media. With an academic background in graphic design and psychology, he has studied the relationships between design and human behavior, which has allowed him to develop a keen sense of how design can influence and often create a desired reaction. With over 15 years of experience in the advertising and printing industries, Marc has worked in nearly all areas from concept and planning through production and delivery to help organizations realize increased efficiencies in production and enhanced brand perception.

## 2.0 Statement of Understanding

The proposed project plan is implemented in 4 phases that build momentum around an aligned vision and values for the Town of Falmouth for the next 10-20 years. The Community Vision and Values Statement is intended to be comprehensive and implementable. It will identify future opportunities and align resources for development as Falmouth prepares to update its 2013 Comprehensive Plan. The revised project plan accommodates:

- Revised timeline – with the assumption that any group in-person session will not occur before 2021.
- Background research and benchmark report are brought forward to Phase 1 (which is virtual background work)
- Phase 2 is adjusted to include the on-line community survey; virtual taskforce work (on key drivers) and data visualization. A pause / reassessment is planned midway through Phase 2 – prior to the think-tank.

### Revised Project Plan

## 2.1 Phase 1: Project Background Research

This project will begin with calls between Future iQ team members and Falmouth Town Staff to establish a final work program and schedule specifying the number and type of planned meetings, engagement activities and deliverables to occur throughout the project. Significant background research including exploration of existing Town and regional documents will be undertaken to understand those strategic directions already established and to identify progress made towards meeting those objectives.

Future iQ is adding a Benchmark report to the project's scope of work. The Benchmark Report would expand on current data by providing an up-to-date community profile in conjunction with nationwide community comparisons across common dimensions. The preliminary information from the background research and Benchmark Report, along with input from Town leadership will be used to develop the Community survey that will be distributed to community stakeholders.

To kick off the project's visioning process with the public, if desired, Future iQ will work with Town Staff to organize a virtual '**Launch**'. This introduces the Consultant Team to the community and gives Town leadership an opportunity to introduce the project and share their aspirations for the project and its outcomes.

**Deliverables** from Phase 1 will include:

- Initial planning and project schedule
- Summary of key data review
- Completed Benchmark Report

## 2.2 Phase 2: Future Scenario speculation (Including focus groups and Think-Tank)

This phase launches the first phase of community engagement with:

- Online community survey – this would explore current issues and concerns and take the ‘community pulse’ on key issues.
- Bring forward the data visualization platform to have more real time results for community.
- Establishing a series of Future Driver focus groups. These would be virtual groups that would ‘deep-dive’ into key drivers. This allows us to progress with exploring trends and future implications.
- The Think-Tank could be in-person, or virtual depending on situation.

Future iQ specializes in studying and understanding larger emergent trends and influences that are reshaping cities, communities, organizations and regions. This future-oriented lens guides Phase Two as it creates the building blocks of a preferred vision for the future using a scenario-based visioning methodology. Using trend research, local knowledge and expectations about Falmouth, this methodology will enable community stakeholders to explore the impacts and consequences of a range of different future paths as they participate in a **Think-Tank**.

The scenario-planning process creates scenarios that are not predictions but are a way of exploring plausible futures. Key aspects and features of the approach include:

- It is customizable and built around the project plan.
- It is data and evidence-based, ensuring a robust outcome, and a vision and plan that deals with reality, rather than a ‘wish-list.’
- Community stakeholder engagement is front and center in the design, and stakeholders will have the option to have input via multiple methods.
- The process is inclusive, easily scalable and can draw input from all segments of Falmouth.

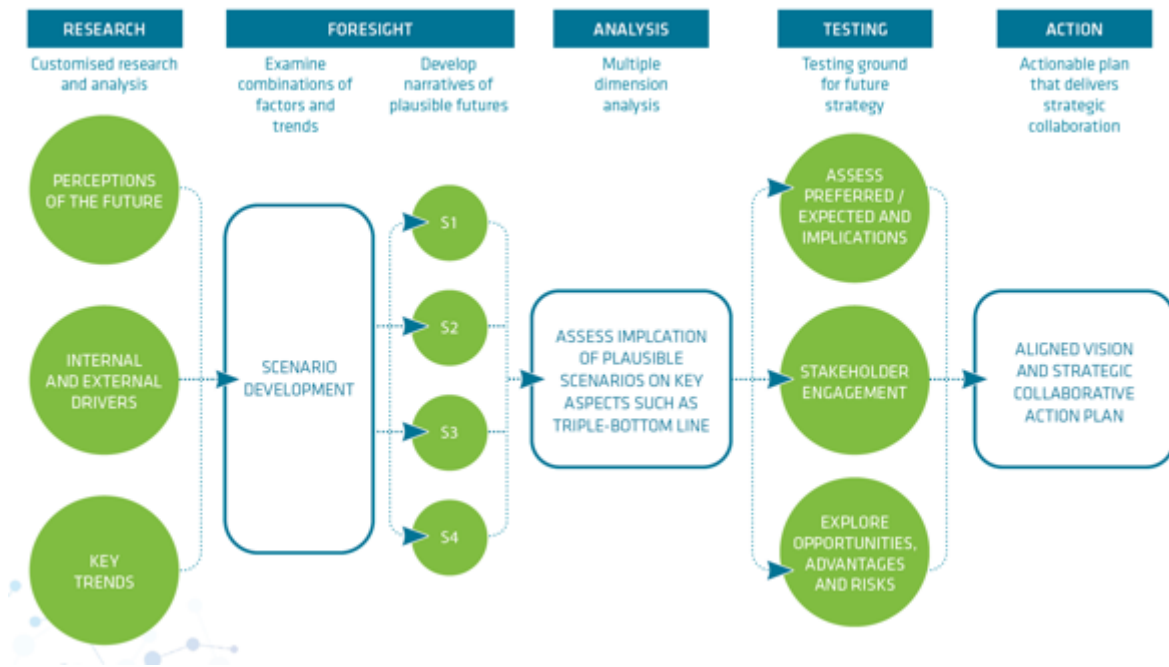

There are several important design principles to the proposed visioning approach, including:

- **Strong collaborative and inclusive people-focused approach.** The long-term success of this project will be dependent on building strong collaboration among the Town’s various stakeholders. The development of this type of ‘eco-system’ needs to be built in upfront in the planning stages of the project with a conscious effort to build on points of consensus to create a common vision for Falmouth.
- **Future oriented.** Building a Town-wide shared vision will be critical for Falmouth. In order to develop an agreed-upon vision and values, community stakeholders will need clarity and a common understanding of the drivers impacting the Town.
- **Data driven approach, including data visualization.** Our experience suggests that projects like this are most successful when built on transparent data-driven approaches, inclusive of as many community stakeholders as possible.

- **Project management and communication strategy.** Building the systems and communication methods to ensure compliance and timely delivery are important features of our project management.

Below is the visual outline of how Future iQ’s scenario-based visioning and planning process works.

### How a Think-Tank Works

The Think-Tank process helps to define a broad vision, goals and directions. It is conducted as a highly participatory 4 to 6-hour workshop (sometimes held over two evenings) that produces a preferred future scenario validated by the completion of individual participant ‘Heat Maps’. The Heat Map results will be incorporated into Falmouth’s community vision, revealing consensus on a preferred future or vision for the City. For Falmouth, the scenario based Future Think-Tank is a tool to gain better understanding of community stakeholder priorities, goals and values to create effective actions for regional resource allocation. This process helps community stakeholders explore and understand emergent trends, and their potential implications across Falmouth. A range of plausible future scenarios are developed that act as a testing ground to assess resilience and consequences.

The Think-Tank provides an important opportunity for Falmouth’s stakeholders to take a ‘deep dive’ into the future.

For Falmouth, we believe this process is trying to answer important questions such as:

- What should Falmouth become?

- What makes Falmouth unique and special and how can the Town use these characteristics to prepare for the future?
- How will community stakeholder preferences fit into this vision?
- How should funds be invested and leveraged to build resiliency for the Town?

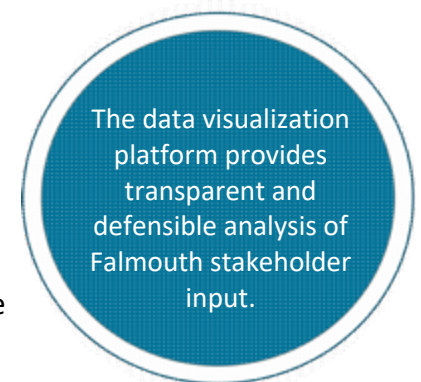

In addition, the Think-Tank process can further examine circumstances including:

- What are the specific strategic gap and growth areas for Falmouth and does previous planning address those areas?
- How may financial/budgetary issues on the State level impact Falmouth and how can the region prepare for potential budget challenges?
- Where does Falmouth fit into the world, and what are its unique competitive strengths?
- How does Falmouth anticipate and take advantage of emerging trends in the economy, Country, and aspirations of community stakeholders?
- What unique hurdles might Falmouth face, and how do we build collaborative approaches and structures to ensure continued successful programs and services?
- Where is there opportunity or need to evolve or change? Where is there an appetite for change, and where might there be resistance to change?
- What is the story Falmouth community stakeholders want to tell about themselves and what do they want the Town to be in the future?

The methodology being proposed is more in-depth than a SWOT analysis and will allow community stakeholders to tackle these questions in an engaging and thought-provoking manner. This will then lead to the clarification of priorities and core values that will define the Falmouth Community Vision.

### **Data Visualization is Key to Understanding Community Stakeholders**

Data collection from surveys provides an inclusive process and a comprehensive understanding of stakeholder views and where points of consensus lie. Future iQ use an online Lab Portal to collect and display Falmouth community stakeholder survey results. Please see <http://lab.future-iq.com>. This approach provides a fun and interactive way to give transparent feedback to participants while at the same time exploring issues and views across the Town. The Lab also serves as a central location where community stakeholders can go to find updated project information and notices.

Future iQ developed the Lab Portal platform to provide a people-focused, data-driven approach to strategic planning and key issue analysis. The following image shows an example of the ‘point of consensus’ in a sample project. The dots represent groups of stakeholders and where their preferred future was located relative to a range of choices within the scenario matrix. The point of consensus will move depending on the search filters selected, allowing for an engaging

and interesting way to explore the various views of different cohorts and groups within the Town. For Falmouth, we would set filters based on profile questions such as age, length of time living or working in the Town, industry affiliation, etc.

**Deliverables** from Phase 2 include:

- Community survey
- Data visualization platform
- Future Driver Focus Groups
- Falmouth Future Think-Tank Workshop
- Scenarios of the Future Report

### 2.3 Phase 3: Broader Community Engagement

Community engagement phase is subject to modification, depending on circumstances. This could be virtual, or in-person.

- Vision community engagement workshops could pivot to online if required.
- The Future Summit could be virtual - We have conducted these with embedded tools such as rapid live polling and chat boards.
- Regardless, we would propose adding additional online engagement around key topics on online discussions boards – we have been developing these for existing projects.

Engagement is a cornerstone of Future iQ’s visioning methodology. Key to effective community engagement is building momentum and excitement around the vision as it is created. Future iQ uses a wide variety of engagement methods to build this momentum – from Launches, Think-Tanks, targeted workshops, interviews, focus groups, summits and surveys that reach all corners of the community. Future iQ goes deep and wide to gather input, making a specific effort to engage those community members that typically are not engaged in civic or community dialogue.

Following the Think-Tank, Future iQ will conduct visioning workshops, conduct interviews, and promote an online Vision survey to broaden the reach and solicit feedback. The scope and various means of this engagement will be developed in close consultation with Town leadership at the start of the project. Groups included in the engagement phase include stakeholders such as:

- Community, recreation and sporting groups
- Business and industry groups
- University students
- Elected officials
- Open community meetings

- Youth and high school sessions

After the engagement week, Future iQ will convene a **Future Summit**. This group will revisit the first Think-Tank and incorporate the results from the expanded engagement to validate the engagement results and develop the Community Vision and Values Statement. The Future Summit serves to foster cohesion and alignment by giving participants the opportunity to validate the final vision, strategic direction and values for the community. This support will be very important to facilitate resource and Town-wide alignment for the upcoming comprehensive plan.

**Deliverables** for Phase 3 include:

- Vision workshops and stakeholder interviews
- Vision survey, data collection and analysis
- Future Summit to validate vision and develop community values

## 2.4 Phase 4: Final Report

At this point, Future iQ will draw together all information to craft the vision framework for the Town of Falmouth. This will involve careful synthesis of all research, engagement results, reports and analysis into a first draft of Falmouth’s Community Vision and Values Statement Report. Future iQ’s final steps in the visioning process incorporates the accumulated input on the draft framework from elected officials, community stakeholders and Town leadership. Future iQ will use this opportunity to work with Town leadership to plan for sustainability by developing realistic, achievable goals. This would include considerations for the comprehensive planning process. The final Falmouth Community Vision and Value Statement Report will be presented by the Project Director to the Falmouth Town Council and community stakeholders as determined at the initial planning meetings.

**Deliverables** for Phase 4 include:

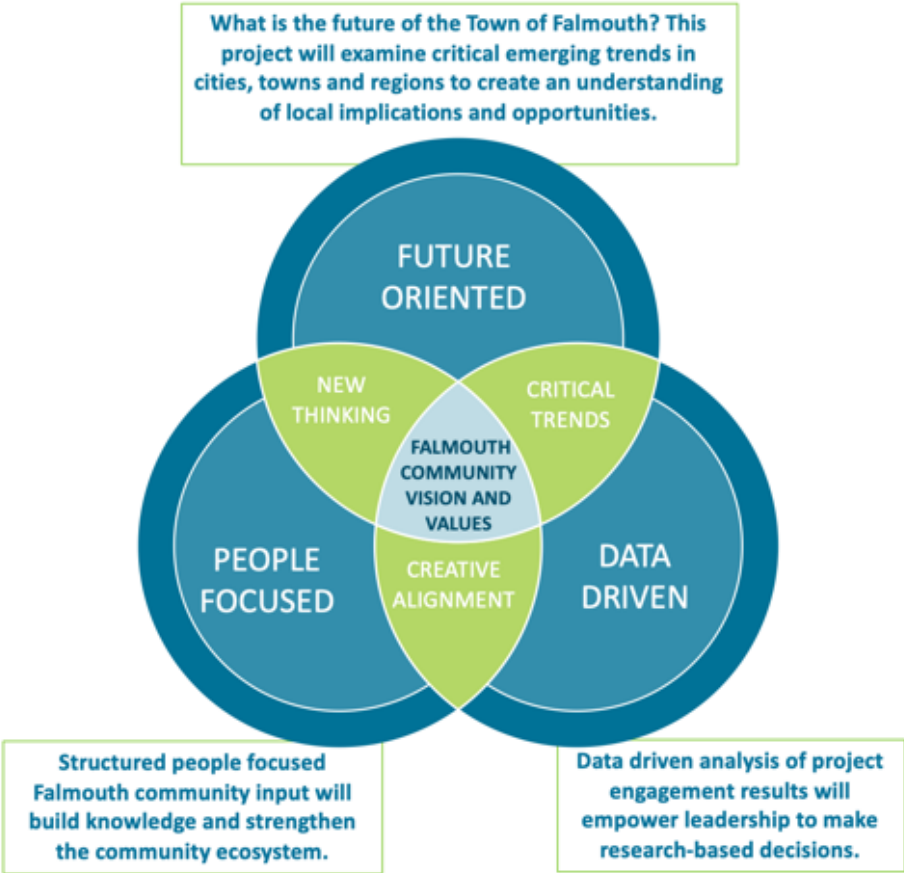

- Final draft of the Falmouth Community Vision and Values Statement and delivery of .pdf report
- **Final Community Presentation**

### 3.0 Consultant’s Considerations

#### 3.1 Proposed Methodology

Future iQ brings a global perspective to strategic visioning that is invaluable to local interests. For the Town of Falmouth, this means access to a wealth of knowledge and experience in the development of visioning and strategic planning for cities, counties, regions, nonprofits and global corporations. Future iQ will use this experience to guide and inform this project and will work with Town leadership to develop comprehensive, future-oriented, sustainable and implementable recommendations and goals to support Falmouth’s Community Vision and Values Statement. These strategies will balance priorities across the important dimensions specific to Falmouth and incorporate global and local best practices.

Future iQ’s strategic planning methodology is based on three primary principles. It is Future Oriented, Data Driven and People Focused. The ‘future orientation’ is particularly important to take account of rapidly emerging social and technological trends. The ‘data driven’ ensures the plan is built on solid research, public input and information. The ‘people focused’ is important to build support for the Vision and values for the Town, and to harness the best possible input into the visioning process.

### 3.1.1 Future Oriented Research

Future iQ produces global foresight publications and research to help our clients build understanding about important future trends impacting cities, regions, communities and industries. This insight helps stakeholders to effectively plan for the future. During this project, Future iQ will draw on their research to present customized trend analysis and information most relevant to the Town of Falmouth. This will help community members explore new thinking and ideas, and critically examine emerging challenges and opportunities.

**Cities of the Future (2015)**  
Explores trends that have the potential for widespread adoption over the next two decades.

**Future of Tourism (2018)**  
Explores emerging trends impacting outdoor and recreation -based tourism industries.

**Future of Manufacturing (2016)**  
Analyzes and provides insights on the key trends that are impacting the global manufacturing sector.

**The Next Industrial Revolution (2018)**  
Explores the broad implications and impacts of an emerging world of accelerating digital technology, robotics and automation.

**Future of Midwest Agriculture (2017)**  
Explores future trends and plausible scenarios for Midwest agricultural industries, economies and communities. Key trends include technological disruption, emergence of global forces and the importance of sustainability.

**Global Consultations – Windsor Castle (2012 and 2019)**  
In partnership with St. George’s house, Windsor Castle, Future iQ explored the challenges of building sustainable communities (2012) and explored the future of urban living (2018).

**The Future of Food (2016)**  
Examines a range of critical catalysts of change relating to the global food supply chain, and the potential impact upon human health, the environment and food security.

### 3.1.2 People Focused Engagement

Future iQ's people-focused engagement process facilitates real conversations that get to the heart of the matter and builds consensus. From large-scale participatory industry forums to targeted focus groups and online survey mechanisms, Future iQ's wide range of engagement methods encourage people to be part of the decision-making, visioning and planning process. This hands-on engagement will be a very important feature of the proposed engagement aspects of this project.

#### Think-Tank – Scenario Planning

The Think-Tank is an innovative approach to stakeholder engagement. It focuses on scenario-based strategic planning and stresses the role of future-thinking in addressing shared interests and concerns.

#### Focus Groups and Planning Workshops

Targeted focus group sessions and customized vision workshops deliver invaluable qualitative and quantitative stakeholder engagement insights.

#### Community and Stakeholder Outreach

Throughout the planning process Future iQ engages a broad cross section of stakeholder cohorts using meaningful and effective methods.

#### Simulation Learning *Future Game*®

The Future Game is a planning simulation tool that provides stakeholders with a dynamic gaming experience that rewards collaboration, innovation, and teamwork.

#### Large Scale Stakeholder Sessions

Large scale groups build momentum and community stakeholder enthusiasm for the planning process.

#### Student Sessions *The Youth Voice*

Individual classroom and large group visioning sessions empower the youth voice in future planning for communities.

### 3.1.3 Data Driven Methodology

Future iQ specializes in sophisticated data collection and analysis. Using our innovative Future iQ Lab Portal, survey data collected from a wide range of cohorts will be presented in a way that allows Falmouth community stakeholders to see how their personal input helps shape the overall vision and comprehensive planning.

#### Stakeholder Surveys

Comprehensive stakeholder data, presented in a transparent and interactive manner, can help build rapid alignment around key points of consensus. This enables organizational leadership to make decisions and planning actions that are defensible and supported by the voices of all stakeholders.

#### Best Practices Benchmarking

Multi-dimensional benchmark studies and analyses of cohort communities provide valuable insight to clients.

#### Data Visualization

Survey results will be collected and presented in an innovative and interactive data visualization platform. This will allow stakeholders to examine the data collected from surveys themselves, explore levels of alignment or divergence around key topics, and selectively filter to view perspectives from their own sector, or other profile category.

#### Lab Portal

A customized Lab Portal gives clients a centralized location for project information, engagement dates, reports, and survey result data visualization.

#### Data Insights

Key data insights and analysis throughout the visioning process provide clients a glimpse into community sentiment and priorities.

#### Future Insight

Future insight and trend analysis during strategy development give clients the opportunity to consider the impacts and implications of future trends on current local planning.

## 4.0 REVISED - Proposed Timeline

The timeline has been modified to:

- Aim for a project team start date in Sept (beginning background preparation)
- Project completion by June 2021
- In-person only until at least early 2021
- Review points in Dec 2020, and March 2021, which are before key engagement phases – this allows adjustment of methodology and timeline, or both, depending on prevailing conditions.

Key Phases	Key Deliverables	S	O	N	D	J	F	M	A	M	J
<b>Phase 1:</b> Project Background research	Initial planning and schedule	■									
	Background research/key data review	■	■								
	Benchmark Report	■	■	■	■						
<b>Phase 2:</b> Future scenario speculation	Launch Community survey		■	■	■

	Community communication plan		■	■	■	■	■	■	■	■	■

## 5.0 Budget

The following budget reflects the original proposed cost. Our experience to date suggests that pivot to online / virtual sessions has two impacts; it increases the number of sessions we run, and the preparation / reporting time; and reduces the direct travel expenses and accommodation. Experience on other projects suggests this seems to be about an equal swap in terms of expenses, so we have retained the existing budget. Emphasis and workload will shift / adjust depending on ‘if and when’ in-person engagement becomes viable. For example, we have added virtual future driver sessions, in lieu of in-person as part of stage one of think-tank. (Example: Assume 20 x 0.25-day virtual taskforce sessions = 5 days consulting time; vs 1 day in-person (2 people), plus travel and prep time / cost.)

Key Phases	Key Components	Proposed Costs
<b>Phase 1:</b> Project Launch	• Initial planning and schedule	\$2,000
	• Background research/key data review	\$2,000
	• Benchmark Report	\$5,000
<b>Phase 2:</b> Think-Tank	• Community survey	\$2,500
	• Falmouth Future Think-Tank Workshop, including future driver focus groups	\$8,000
	• Scenarios of the Future Report	\$5,000
<b>Phase 3:</b> Community Stakeholder Engagement	• Community vision engagement sessions (1 week)	\$15,000
	• Vision survey, data collection and analysis	\$3,000
	• Data visualization platform	\$3,000
	• Future Summit	\$5,000
<b>Phase 4:</b> Final Report	• Draft and finalize Falmouth Community Vision and Values Statement document	\$10,000
	• Presentation of the Falmouth Community Vision and Values Statement	\$2,500
<b>Total Fees &amp; Expenses</b>	<b>FIXED PRICE PROPOSAL</b>	<b>\$63,000</b>

**Payment schedule:**

- 20% on signing of contract
- 20% at completion of phases 1,2, 3 and 4

## 6.0 Similar Projects Completed

### 6.1 Examples of Similar Visioning and Strategic Planning Projects

Future iQ has significant experience in strategic visioning and planning for organizations, towns, municipalities, corporations and regions.
