

PLASTIC BAG RECYCLING

THE PROBLEM WITH PLASTIC BAGS

Films and plastic bags are not for your curbside recycling bin, they jam up our machines and end up as litter.

WHAT IS A STRETCHY PLASTIC?

Stretchy plastics that aren't accepted as recycling at ecomaine include bubble wrap, plastic films, and any other plastic that isn't rigid.

WHERE CAN I RECYCLE THEM?

You can recycle these plastics at places like Target and Walmart. For a list of more places that will accept them go to bagandfilmrecycling.org

THE BENEFITS OF RECYCLING STRETCHY PLASTIC

When you bring in your films, they get turned into new products like composite wood. Made in the USA using 95% post-consumer plastic film and reclaimed sawdust.
