Commercial:		Nature of the Business:			
Addition / Other:		Other Description:			
Number and type of plumbing fixtures		Instructions: Please fill out this application form as completely as possible, include the date and tax map and lot number, if known. Also provide the owner information requested and the applicant information, if different than the owner. Building information should include the type of structure. Please note that accessory apartments include only those proposed within an existing single family dwelling. Please include the number of apartments or multiple living units. On commercial or other buildings, please include a description of the building use. Service line information should detail if a new line, or the use of an existing service line, is planned. An inspection is required for new lines and existing lines of questionable condition. If known, include the information on the type and size of the proposed line and if the service will be pumped or flow by gravity. Please provide the total number of each type of new plumbing fixture within the proposed building. Include the total number of any unlisted fixtures under "Other". As an example, a new single family dwelling might include one domestic sink, one dishwasher, one domestic washing machine, and with two baths, it would have two of each of the bath fixtures, tub, toilet, and lavatory. Uncommon buildings or commercial uses that vary substantially or include uncommon fixtures will be individually reviewed to determine the appropriate connection fee. Notes/ Other information:
