

Blackstrap Road Comments

1. February 3, 2020: Douglas Couper

Theo, thank you;

As a person who runs and commutes by bike on Blackstrap and Babbidge regularly, I am quite tuned in to safety on those roads. The improvements to the town section have been extremely helpful for runner safety. Thank you!

If I were to make a recommendation as to the order Blackstrap Rd segments are addressed, I would recommend the following:

1st, the power lines north Of Mountain Road to Babbidge Rd, as this is the busiest section of road.

2nd, from Babbidge Road to Hurricane Road, as this section of road contains several turns, and if there are cyclists or runners on the inside of one of those turns, it is hard for cars to see them, and no shoulder to escape to.

Following that, it does not matter whether the road is improved south of Mountain Road, or north of Hurricane Rd. I would favor which ever segment is easiest to do, to get more miles done quicker.

Thank you so much for these improvements. It truly makes a big difference.
