NOTES TO USERS

The information on this map is from the Flood Insurance Rate Map (FIRM) database maintained by the Federal Emergency Management Agency (FEMA). The FIRM is based on current scientific and engineering data. It reflects the flood hazard at the time the data were collected. The FIRM is periodically updated as advances in scientific and engineering understanding are made. It is used to establish flood insurance rates for properties located within the floodplain.

FEMA is committed to providing the most current and accurate FIRM information to the public. To help ensure that the FIRM database is up-to-date, FEMA conducts a thorough and comprehensive review of the FIRM data every 5 years. These reviews include an examination of recent changes in the floodplain, such as new construction, and an assessment of changes in the underlying flood hazard. The FIRM database is also updated on a regular basis to reflect changes in underlying data, such as changes in topography or new scientific understanding of flooding.

If you have any questions about the information on this map or the flood hazard in your area, please contact your local FEMA representative or call 1-800-638-6620. To determine if flood insurance is available in your community, contact your insurance agent or call the National Flood Insurance Program at 1-800-368-3688.

The FIRM database is available for download from the FEMA Flood Map Service Center website at http://msc.fema.gov. Available products may include previously issued Letters of Map Change, a Flood Insurance Study Report, and/or digital versions of this map. For more information about the Flood Insurance Rate Map Program, please visit the FEMA Flood Insurance Program website at http://www.fema.gov.
