**FALMOUTH, MAINE**

**TOWNSHIP OF FALMOUTH**

**SHEET NUMBER: 4 OF 6**

**PREPARED BY: PROJECT: SF-M091**

**PREPARED FOR:**

**REVISIONS:**

**DESCRIPTION:**

**DATE:** NOV. 2017

**FILE NAME:** SF-M091

**CHECKED:**

**DRAWN:**

**DESIGNED:**

**JOB NO.:**

**SCALE:**

**NOT TO SCALE**

**GENERAL NOTES:**

1. FOR LEGEND, ABBREVIATIONS, AND GENERAL NOTES SEE DRAWING 1.
ELECTRICAL

1. Locate the end of the (2) existing 2-1/2" conduits crossing the roadway and extend (2) 2-1/2" Schedule 40 PVC conduits to a depth of 24" to the location of the meter socket.

2. The first 2-1/2" conduit will contain (1) 3/0 gow ki Cu conductors and (1) #2 and (1) ground. After turning out of the ground, change the conduit to 2-live and extend the bottom of a new bottom feed meter socket. Secure the conduit to the top of the electrical meter socket.

3. Secure the conduits to the face of the building and cap off.

4. Locate the end of the (3) existing 2" conduits crossing the roadway and extend (3) 2" PVC conduits to the building. Each of the conduits shall contain a nylon pull string. Locate 2" to the left of the electrical meter socket.

5. Secure the conduits to the face of the building and cap off.

COMMUNICATIONS

1. Locate the end of the (1) existing 2" conduit crossing the roadway and extend (1) 2" PVC conduit to the building. The conduit shall contain a nylon pull string. Locate 2" to the left of the new telephone service.

2. Secure the conduit to the face of the building and cap off.

GENERAL NOTES

1. For Legend, Abbreviations, and General Notes see Drawing 1.
