Subject: Re addition areas to treat for BTM

Hey Nathan,

I took a swing by the Fire Station, Police Station, Public Works, and Landfill and looked for nests and all DO have populations.

Fire Station – Left and right side of property

Police Station – all around perimeter of property

Public Works – left side, all along back, and around green building

Transfer Station – island of trees between ent and exit where blue building is – that area might get treated anyway from the road but wanted to mention.
